

## W14-P1: Use sql to create schemas of cabins\_xx, guests\_xx, bookings\_xx, settings\_xx, and use Uploader to upload all data

The screenshot shows a development environment with VS Code on the left and a web browser on the right. In VS Code, the `Uploader.jsx` file is open, showing functions for deleting data. The browser displays 'THE WILD OASIS' dashboard. A red box highlights a success message: 'Successfully Deleting bookings\_xx, cabins\_xx, guests\_xx'. Another red box highlights the 'Upload ALL' button in the 'SAMPLE DATA' section.

```
import { useState } from 'react';
import { supabase } from './supabase';
import { useToast } from './hooks';

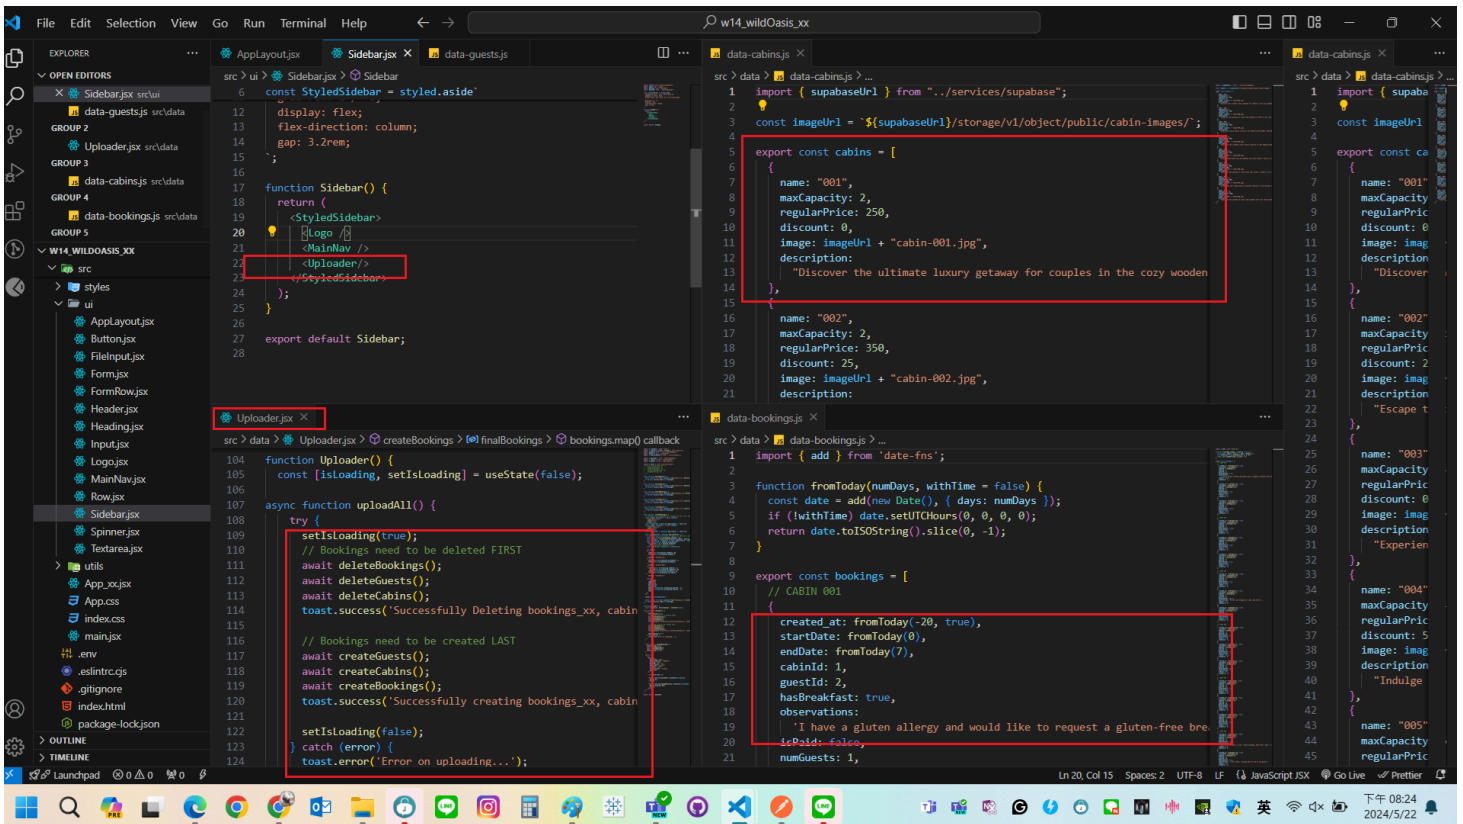

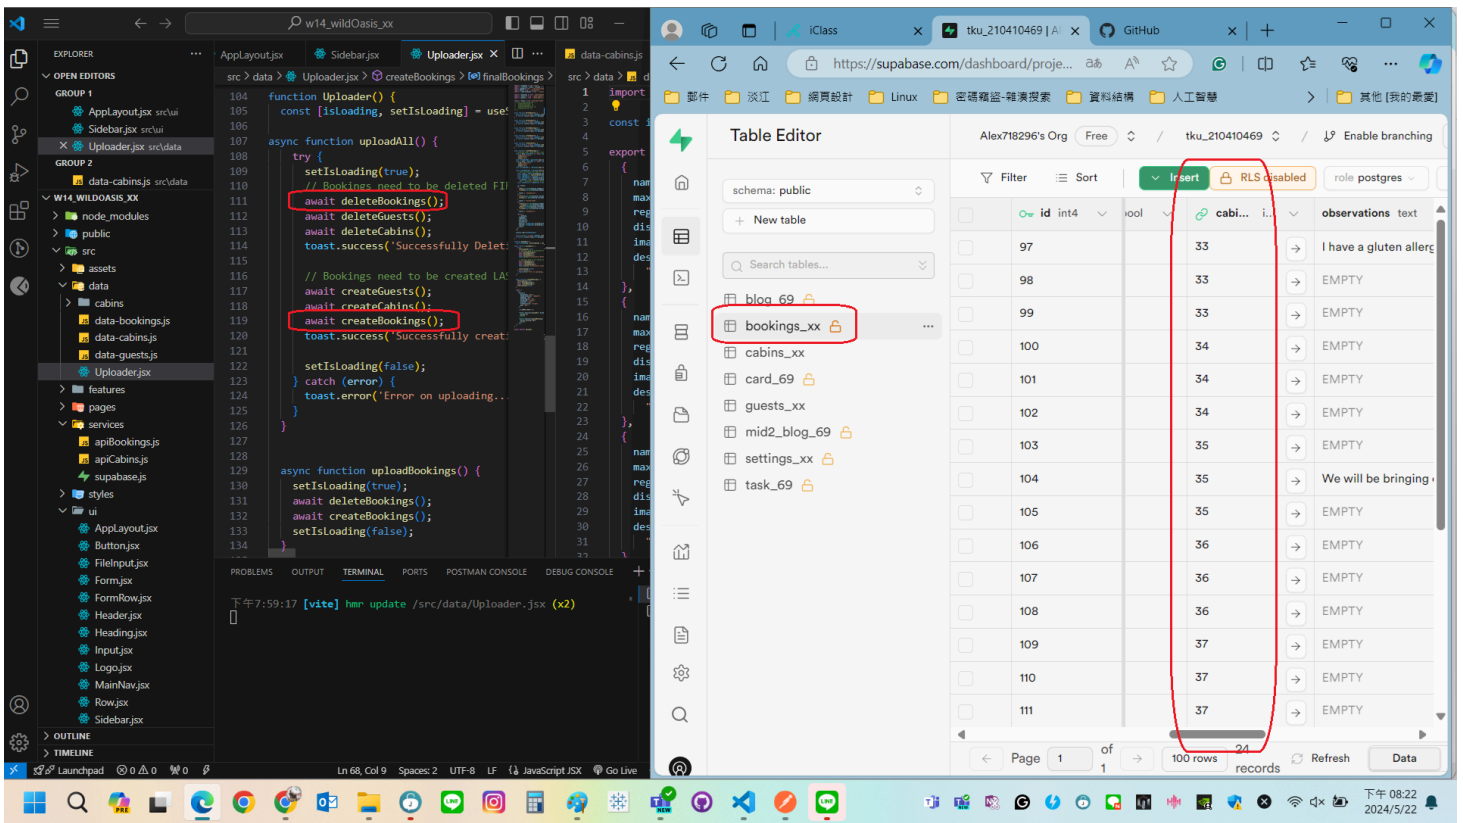

export const deleteData = async () => {
  const { error } = await supabase.deleteFrom('bookings');
  if (error) console.log(error);

  const { error } = await supabase.deleteFrom('cabins');
  if (error) console.log(error);

  const { error } = await supabase.deleteFrom('guests');
  if (error) console.log(error);
};
```

The screenshot shows the Supabase Table Editor on the right, displaying a list of tables. A red box highlights the 'cabins\_xx' table. The VS Code editor on the left shows the `Uploader.jsx` file with functions for creating and deleting data. The terminal shows the command `hmr update /src/data/Uploader.jsx (x2)`.

87fc590 htchung Wed May 22 20:36:09 2024 +0800 W14-P2: Make jonas code work, and show cabins ar

The screenshot shows a GitHub repository page for Alex718296/1122-WP2-2N\_69. The page displays a list of commits. A red box highlights two commits:

- W14-P2: Make jonas code work, and show cabins and bookings info** (committed now)
- W14-P1: Use sql to create schemas of cabins\_xx, guests\_xx, bookings\_xx, settings\_xx, and use Uploader to upload all data** (committed 1 hour ago)

Below these are commits from May 15, 2024:

- w13\_wildOasis\_starter\_xx** (committed last week)
- W13-P3: Git logs of W13** (committed last week)
- W13-P2: Get first booking\_xx data, with corresponding cabin\_xx and guest\_xx data** (committed last week)
- W13-P1: Get first Cabins\_xx data from Supabase** (committed last week)
